Work experience

DevOps Engineer — Endsight

Nov 2021 — Present

Handle internal systems administration (RBAC, user management, integrations) and internal automation for an MSP with around 150 employees and 400+ clients

Implement user on/offboarding automation using Flask + FastAPI and integrating multiple external systems (Workday, Entra, internal systems) via API.

Integrated 4+ APIs to automate proactive work ticket campaigns to find unaligned devices and get them in compliance with standards

Manage internal Github organization, including access, policies, and organization structure to improve security and ease of use for internal teams.

NOC Engineer — Flextechs

Jan 2020 — Nov 2021

Worked with clients to improve monitoring of backups and internal systems

Led an effort to improve framework compliance (HIPAA, PCI) and internal system security

Led recovery efforts after security incidents, including ransomware attacks.

Ops Technician — IP Services

Jun 2019 — Jan 2020

Improved skill with networking technologies (Solarwinds, Fortigate, Juniper, Cisco)

Assisted in the deployment and management of network infrastructure in a small colocation environment with around 15 clients.

Assisted with troubleshooting client issues.

Education

Lane Community College — Computer Network Operations

AAS • 2018 — 2019 • Graduated 2019
